

Quart – Waters for 90 Days

The Quart is the perfect choice for your home vegetable gardens.

Step-by-Step Installation of the DRiWATER® Quart

1. Dig a planting hole to the proper depth for the plant. Water the hole.

2. Carefully cut the bottom off the carton where indicated, exposing the DRiWATER®. Place plant in hole and install the Quart as shown.

3. The bottom of the Quart should be directly against the root mass. When using multiple Quarts, place at equal distances around plant. Backfill the hole with soil.

4. Water plant thoroughly.

Container Size	# of Quarts	Supplemental Watering
1 Gallon	1-2	Installation & +/- 30 Days
3 Gallon	3-4	Installation & +/- 30 Days
5 Gallon	5-6	Installation & +/- 30 Days
Recommend 1 quart per foot height of plant. Usage varies according to the requirements of the individual plant.
